

Dr Sumeet Kumar is currently a full time neuroradiologist at the National Neuroscience Institute, Singapore. She is faculty of the National Residency Program, Radiology, Singapore and an adjunct faculty at the Duke- NUS Medical School, Singapore; as well as an adjunct scientist at the Singapore Bio Imaging Consortium (SBIC) and A\*STAR research facilities.

She studied medicine at Topiwala National Medical College, Mumbai, India and completed radiology training at the Tata Memorial Hospital, Mumbai, India. She furthered her experience in neuroradiology with adult and pediatric neuroradiology fellowships at the Royal London Hospital and Great Ormond Street Hospital for children, London (GOSH). She relocated to Singapore in 2009, working initially at KK Women's and Children's Hospital and subsequently at the National Neuroscience Institute, Singapore after completing the advanced specialist training program, in Singapore. She was awarded the Fellowship of Royal College of Radiologists (FRCR, UK) in 2006 and European Diploma in Neuroradiology (EDiNR) in 2015, by the European Society of Neuroradiology. She was awarded a fellowship at the Leiden University Medical Centre, The Netherlands, a leading research centre in Europe with a high field strength, 7Tesla MRI facility, in 2016.

She has a special interest in advanced imaging techniques, especially for brain tumours, dementia and hydrocephalus. She enjoys the academic practice, the opportunity to contribute to diagnosis and treatment of complex neurological and neurosurgical cases; and teaching. She is an invited speaker at several national and international courses and conferences.

She has hosted an educational TV show in India (Topper TV) which stayed on air for 10 years. Dr Sumeet will mentor medical students Raghavendra and Ishan .
